

## What is the "B Rose Box?"

The B Rose Box is a comprehensive e-design package in a box delivered to your home, which includes:

- A detailed floor plan with furniture placement
- A mood board showcasing the overall aesthetic
- A list of recommended furniture and decor items with links to purchase
- Paint color and/or wall covering recommendations
- Fabric and material samples (if applicable)
- Instructions for implementing the design

## Why the "B Rose Box?"

E-design offers a range of benefits that make it an attractive option for many homeowners:

- **Affordability:** E-design services are more budget-friendly than traditional interior design.
- **Convenience:** The remote nature of e-design eliminates the need for in-person meetings (but always welcomed), allowing you to work with a designer (me!) from anywhere in the world. This flexibility is perfect for busy individuals or those living in remote areas.
- **Flexibility:** E-design empowers you to implement the design at your own pace and on your own schedule. You can take your time with purchasing and installation, ensuring that each decision aligns with your budget and preferences.
- **Personalized Approach:** E-design still prioritizes personalization. I take the time to understand your style, needs, and preferences, creating a design plan that reflects your unique vision.
- **Visualizing Your Space:** E-design utilizes digital tools like mood boards, shopping list, fabric and material recommendations, and floor plans to help you visualize the final design. This allows you to see how the elements will come together, reducing the risk of surprises or dissatisfaction.
- **Expert Guidance:** E-design provides you with professional guidance and expertise without the need for constant in-person meetings. Designers offer valuable insights, recommendations, and resources to help you make informed decisions.

- **Faster Turnaround:** Compared to traditional design projects, E-design often has a quicker turnaround time. Typical turnaround time is within 4 weeks.
- **DIY-Friendly:** E-design is ideal for those who enjoy a hands-on approach. You get to be involved in the implementation process, giving you a sense of ownership and accomplishment.

Overall, e-design offers a modern, convenient, and cost-effective way to achieve your interior design goals. Whether you're looking to refresh a single room or transform your entire home, e-design can provide you with the expertise and resources you need to create a space you love.
